

REUSABLE FACE SHIELDS

We offer clear plastic sheets for reusable face shields that provide protection against the spread of the COVID-19 virus.

How can we help you?

If you are looking for a durable sheet material for non-disposable, reusable face shields,

Engineered Sheet Products offers PSS-3000 Optical Cast sheet, featuring excellent optical quality and superior scratch and chemical resistance. UV resistance options are also available. Our PSS-3000 Optical Cast sheets can be laser cut to your specifications so that they are assembly-ready.

Standard sheet sizing for PSS-3000 sheets is 960 mm x 480 mm, with thicknesses of 0.7 mm to 2.0 mm. All sheets come with standard masking on both sides with a blue protective film. Paper masking is also available at an additional charge. The minimum order quantity is 10 sheets, with lead times currently estimated at 3-4 weeks, depending on the quantity of sheets ordered.

- Good alternative to disposable shield materials
- Excellent resistance to damage caused by harsh chemical disinfection
- Superior scratch resistance
- Excellent optical quality
